3.sort linked list LC-148

https://leetcode.com/problems/sort-list/

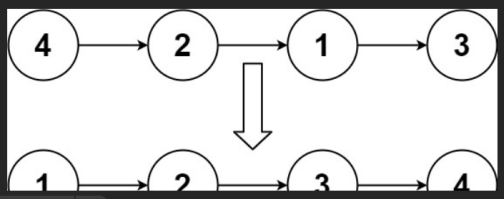

Description | Editorial | Solutions | Submissions

148. Sort List

Medium | Topics | Companies

Given the `head` of a linked list, return *the list after sorting it in* ***ascending order***.

Example 1:

13.3K | 213 | 14 Online

Code | Testcase | Test Result

Java | Auto

```
8   *     ListNode(int val, ListNode next) { this.val = val; this.next = next
9   * }
10  */
11  class Solution {
12      public ListNode sortList(ListNode head) {
13       if(head == null || head.next == null)
14           return head;
15        ListNode slow = head;
16         ListNode fast = head;
17      while(fast.next != null && fast.next.next != null) {
18           slow = slow.next;
19           fast = fast.next.next;
20         }
21         ListNode right = slow.next;
22         slow.next = null;
23        ListNode leftSorted = sortList(head);
24         ListNode rightSorted = sortList(right);
25          return merge(leftSorted, rightSorted);
26      }
27
```
